STONE SOAP ULTRA

TECHNICAL DATA SHEET

STONE SOAP ULTRA is a highly concentrated water based cleaner used by the professionals which has been specifically formulated for marble, granite, slate, limestone, terrazzo, cultured marble, ceramic and quarry tile and all other natural interior and exterior stone surfaces.

STONE SOAP ULTRA can be diluted from 2oz. to 1 gallon with water which means that each gallon of product will make upto 64 gallons of cleaner (DO NOT confuse this product with the usual "spray and wipe" type products which are mainly water). For more stubborn stains use this product at a higher concentration, it can even be used without dilution without damaging the stone, just rinse off with water after treatment.

STONE SOAP ULTRA is specifically formulated to be "stone friendly" and when diluted will not dull or damage the stone surface and it will not leave any soap residues or cause the surface to become slippy. Unlike other harsh and aggressive cleaners, our product is pH neutral (pH 7), does not contain any abrasives, acids, alkalis, salts, phosphates, d-limonene, artificial colors, fragrances and preservatives.

STONE SOAP ULTRA will clean down into the the pores of all natural stone surfaces to remove dirt, dust, grime, soot, grease, oils, food and beverage spills, finger-prints and scuff-marks.

CLEAN UP PROCEDURE

Clean equipment with water spirits including the sprayer head between applications.

SHELF LIFE

In the original container the product will have a shelf life of at least 6 months.
If the product appears to be separated or has formed a gel contact Stone Technologies, Corp. before use.

TYPICAL PROPERTIES

Appearance	:	Clear Colorless Liquid
Ionic Nature	:	NA
Odor	:	None
Specific Gravity	:	1.00 g/ml
pH	:	7.0
Compatibility	:	Do not mix this product with any other chemicals.

PACKAGING

This product is available in the following containers;

- 1 quart plastic bottle
- 1 gallon plastic bottle
- 5 gallon plastic pail
- 55 gallon plastic drum
